Subject: RE: ARSG Technical Work Group Meeting

Thanks Peter. I will plan to call in to the meeting. If possible, can you send any presentation/other handouts for this meeting on Feb. 4th ahead of time. It will help those of us calling in to be on the same page as the group in Durango.

Also, I just sent an email with a link to our 2013 Sampling & Analysis report of the sampling that EPA performed last year. I didn't have everyone's email for ARSG so if you could send to those that I did not include I would appreciate it.

Thanks.

Paula Schmittdiel

Subject: RE: ARSG Technical Work Group Meeting

At the last technical work group meeting we set another meeting on the Feb. 4th. I pushed up the time to 12:30. And I will have to leave at 2:30.

On the agenda, we will look at maps and land ownership to see where wetland treatment might be possible.

We will start to talk about water quality goals to see what people are thinking.

We will talk about what sources of water might be appropriate to collect for possible bench scale testing

We are planning to meet on Feb. 4th at 12:30 at the Public Lands Center in Durango.

Here is the call-in information:

Subject: ARSG Technical Work Group Meeting

Dear ARSG Technical workgroup – Ron Borrego with AMEC in Durango has been talking with a couple of us about a wetlands treatment project they have been working on at a large mine drainage site in the San Juans. They have approached Kinross to fund a scoping study about how this type of wetlands could be utilized to deal with metal loading in upper Cement Creek. Kinross has not made any decisions regarding funding. Kinross wants ARSG to decide if such a study would be useful and worthwhile, and if so, are there other funding partners that might want to participate.

AMEC would like to talk more about their proposal with the technical work group. We are trying to set up a work group meeting in Durango on the afternoon of January 22nd at the public lands center. We will have call in capability. I will send out the number later.
